

Worker: Hi Keylian, why so serious?

Keylian: Your workspace is a disaster [again] ...

.... your rubbish bin is full of confidential documents!

your computer ... please, don't get me started phishing emails are the least of it!

... *and* – if all *that* wasn't bad enough – strangers are just able to walk around here and nobody seems to take any notice!

OPTION 1a (harder) : Just imagine what could be stolen from here!?

OPTION 1b (harder) : Just imagine what damage could be done here?

OPTION 2 (weak) : Just imagine what could happen here!

Worker: Okay, okay, that *is* [pretty] bad but how should *I* know all this?

Keylian: Look, it doesn't have to be this way

... play "Key to Excellence" – more than just another game – and learn to identify where the security risks lurk in your workspace – and how *you* can deal with them before they become a problem.

Key to Excellence.
